

COMPANY BACKGROUND

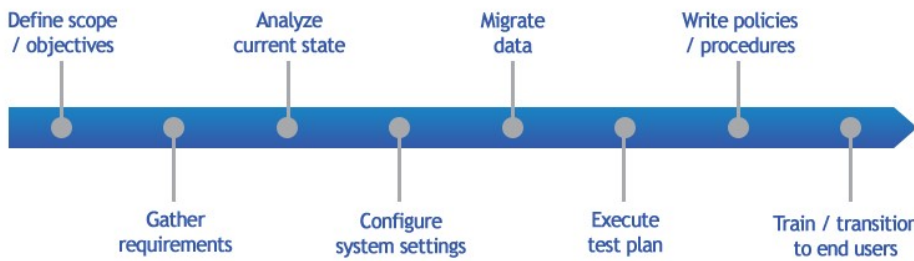

Grandview Analytics is a professional services firm that exclusively serves the financial industry. We provide tailored solutions to solve complex business process, data management, and technology challenges for banks, investment managers, financial technology firms, and financial service providers. Our mission is to provide strategic operational and data management leadership that drives growth for our clients by seizing revenue opportunities, increasing operational efficiency, and mitigating risks.

All of our service offerings are aligned with our mission and are based on the premise of combining people, process, and technology to implement scalable solutions that produce accurate and timely information for our clients and their investors.

TECHNOLOGY IMPLEMENTATION SERVICES

Grandview offers full life-cycle implementation services for vendor and proprietary financial technology solutions. By combining our deep financial industry backgrounds with our data management, business analysis, and project delivery expertise, we are able to navigate complex technology projects that ensure business objectives are met.

IMPLEMENTATION LIFE CYCLE

HOW WE HELP CLIENTS

Leverage Grandview resources to help at any point during the project life cycle. We provide:

- A team of experienced financial service professionals
- A flexible staffing model that allows you to scale up and down
- Ability for you to focus on your core competency

CLIENT PROFILE

- Financial Technology Providers
- Investment Management Firms
- Financial Service Providers

HOW WE ARE DIFFERENT

We hire top tier talent from the financial industry. Our resources provide:

- Deep financial industry expertise across asset classes and investment vehicle types
- Strong data management and analysis skills
- A unique blend of financial, business, and technical expertise

LET'S WORK TOGETHER

Grandview is seeking strategic partnerships with financial technology firms. Please contact us to discuss an implementation partnership.
